Skills

Java

Python

C#

Database - MySQL

Software Design and Architecture

Data Mining

Object Oriented Programming

Software Validation and Testing

Summary

I am a 3rd year Software Engineering student at Üsküdar University.

Details

I take care to develop myself in different areas during the software development process.

I worked on a deep learning project using **Python** language. In this context, in a project where we used **SVM** and **KNN** classification algorithms, we aimed to produce logical predictions with the data set we created. I have a special interest and curiosity in **deep learning** and **data science**.

In addition, I worked on a Cinema Management System project that I developed using **Java** and **MySQL** with a layered architecture in accordance with **OOP** rules. I aim to produce innovative solutions by combining both theoretical knowledge and practical experience.

I am open to learning to continuously improve myself and adapt to new technologies.

Education

Bachelor of Science in Software Engineering
Uskudar University
GPA : 3.71
2022-2026

Uskudar University Preparatory School
GPA : 86/100
2021-2022
